

» SENTRY GAS WEIGHING SYSTEM

The **GasQuip Sentry** is a portable device for measuring the weight of SF6 gas being used to fill or top up a circuit breaker. Normally when technicians need to record the amount of SF6 gas used, they have to put a heavy gas cylinder up on a scale. This can be very dangerous and time consuming for an operator given that a full bottle of SF6 weighs over 200lbs. The Sentry attaches directly to the bottle, and has a digital readout to show precise weight measurements.

FEATURES:

- MOUNTS DIRECTLY TO CYLINDER
- LARGE DIGITAL READOUT
- CONTROLLED & ACCURATE FILLING
- SIMPLE OPERATION

WHAT'S INCLUDED:

- TRANSPORT CASE
- CALIBRATION CERTIFICATE
- POWER CABLE

GENERAL SPECIFICATIONS:

- | | |
|--|--|
| • DEVICE DIMENSIONS: 7.3" X 7" X 9" | • CASE DIMENSIONS: 15" X 10.5" X 9" |
| • POWER SUPPLY: 5V, 2.5A MICRO USB | • ACCURACY: ± 0.01 LBS |
| • FLOW SPEED: UP TO 33 LBS/HR | • WEIGHT: 8 LBS |
| • OPERATING TEMPERATURE: 0-60°C | • INPUT CONNECTION: CGA 590 |
| • OUTPUT CONNECTION: DN8 MALE OR CUSTOMER SPECIFICATION | |
